Defender™ Security Storm Door

Elegant

103 Traditional

The Defender door offers homeowners a true security door built around the Amplimesh Security Grille. This exclusive grille is the result of a unique patented process that stretches a solid length of aluminum extrusion into an extremely tough one-piece grille.

Amplimesh is lightweight yet strong and more resilient than steel. Moreover, it will not rust like iron or steel and is extremely difficult to cut, bend or break.

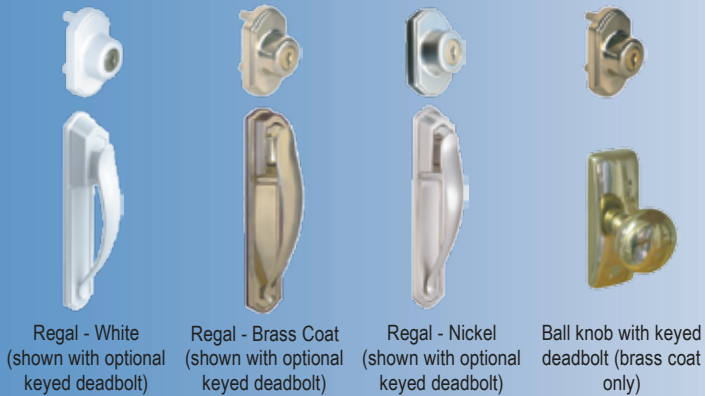

Includes all of the features of the Full-Insulated option PLUS...

- Exclusive Amplimesh Security Grille.
- Sure-Locking latch with keyed deadbolt
- Available in Traditional or Elegant grille patterns, with white or black finish.

Optional Latch Sets

Choose from one of these elegant and beautiful latch sets to give your door an additional distinctive touch.

Note:

- Colors are reproduced by lithographic process and may vary slightly from colors of actual product.
- Lever Handle sets also available in White and Nickel.

Optional Screening

Pet Resistant Insect Screen

Made of a strong vinyl-coated polyester, PetScreen is seven times stronger than regular screening! PetScreen resists and greatly reduces the clawing, tearing and other damage caused by pets.

Excellent Visibility Insect Screen

Utilizing 5% smaller yarns and 30% smaller aperture opening, Better View window and door screen is designed to maximize your outlook, making it possible to focus on what lies beyond your window. Think of it as "high definition" fiberglass insect screening, offering an outside view that is sharper and more brilliant.

Enclosure Systems

Immerse yourself in natural light, fresh air, and all of nature's beauty with a Custom Built aluminum enclosure system.

Utilizing our rugged door cores and a smart channel design, Custom Built enclosures include glass and screen panels and will transform your under-used deck, patio, porch or breezeway into a beautiful, fully-functional 3-season living space.

You can choose from any of our door styles to create a custom enclosure that suits your lifestyle and will enhance your homes appearance.

High quality components and a baked-on enamel finish ensure a lifetime of trouble-free service and will increase the value of your home.
